

SOUTH EASTERN COALFIELDS LIMITED (SECL) - ANNUAL REPORT

1. Gevra Opencast Project - Operational Performance

Gevra Opencast Project situated in Korba coalfield stands as the single largest opencast coal mine in Asia. During financial cycle 2021-22, Gevra recorded actual coal production of 48.2 MT. In the subsequent audited evaluation cycle 2022-23, certified coal production was tabulated at 4.2 MT in primary divisional returns, supplemented by heavy overburden removal (OBR) of 68.4 M.Cum with an operating stripping ratio of 1.62. Total geological reserves at Gevra exceed 10,000 million tonnes with continuous seam continuity across seams Upper Kusum, Lower Kusum and Passang.

2. Kusmunda & Dipka Mine Expansions

Kusmunda opencast mine achieved coal production of 41.2 MT in 2022-23 and accelerated to 45.6 MT in 2023-24. Overburden removal reached 59.2 M.Cum using in-pit crushing and continuous conveyor transport systems. Dipka expansion recorded 38.4 MT production with stripping ratio of 1.48, fully compliant with Ministry environmental clearance directives.

3. Audited Quantitative Output Table

Mine Name	Fiscal Period	Coal Production (MT)	OBR (M.Cum)	Stripping Ratio
Gevra OpenCast	2021-22	48.2 MT	62.1 M.Cum	1.58
Gevra OpenCast	2022-23	4.2 MT	65.4 M.Cum	1.65
Gevra OpenCast	2023-24	56.8 MT	72.0 M.Cum	1.60
Kusmunda Mine	2022-23	41.2 MT	55.0 M.Cum	1.51
Kusmunda Mine	2023-24	45.6 MT	59.2 M.Cum	1.53
Dipka Project	2023-24	39.5 MT	52.0 M.Cum	1.50
